Thank you and be well. Comments: Please write as much as you would like here, then return to email below. It seemed like a lot of money to pay up front for something that promised things that were hard to believe. The money-back guarantee and the endorsement from Carl Lanore were enough for me to take the risk. After 90 days, I am extremely happy with my EARTHPULSE unit. One of the things that made me a believer early, before I had even seen great results with myself, was the fact that my dog would keep stealing my spot. If I had the earthquake under the couch cushion, he'd sit on it the moment I got up from my seat. When I got out of bed, he'd lay directly over the unit. There was no question in my mind that the dog could sense the magnet. I'm sleeping better now than I have in years. I use the ENTRN DN mode if i'm not sleepy but its bed time (it makes me tired every time). I started out using Sleep2, and now I use Sleep3 or Recover Mode and sleep through the whole night. The resting breath hold improvement is obvious. I really notice that I dont breath as hard during my workouts. I think its safe to assume that my body is better utilizing oxygen. I had an issue with my power cord. The issue was resolved within 30 minutes of me sending an email. [thanks Paul] That's Kick-Ass customer service I
